

Below is the dimensional difference between the Krontec RFC-89-TN-LM vs RFC-89-TN-LM-S

PLEASE NOTE this drawing shows the collector part fitted to the RFC-89-TN-LM and shows the DIFFERENCE in length where indicated.

The collector part number RFC-89-TN-COL is the same for both parts.

Both valves will use the same interface in terms of sealing. It is just the length that differs.
