

Universal Tap Key Chuck

Brand: Ober

Product Code: 7620006

Universal Tap Key Chuck

Universal Tap Key Chuck for use with a range of taps. This item is used in place of the standard Quick Release chuck which accepts a range of tap holders, and each tap fits a specific tap holder.

The standard system is more robust in connection and has a greater range, however if you wish to have the ease of one chuck where you can simply insert a range of taps directly into it (without the need for multiple tap holders), then this may be what you are looking for.

This part fits B-10 connection, and suits ERMAS88D, ERGOMAS120D, ERMAS88 & ERGOMAS120.

Specifications

Capacity	Square Cap (ø mm): 1 - 8 Shank Cap (ø mm): 1 - 9.5
