

INDUSTRIAL CHIPPING HAMMER (HEX)

Product Code: **AA3B (H)**

INDUSTRIAL CHIPPING HAMMER (HEX)

Solid performer with heaps of power! Made in Japan from the best quality materials will provide years of performance and durability.

This chipping hammer is suitable for many applications ranging from quarry work, concrete pipe and construction applications, through to underground mining and everything in between.

This model is a favourite with many quarry, mining and construction companies because it has great power to weight ratio.

The spring retainer on this tool also aids in absorbing some of the impact generated by the chisel on the retainer, and thus reduces some of the vibration. The spring retainer also lasts longer and has a considerably cheaper replacement cost to that of the solid retainer systems used on other tools.

Features:

- * Precision valve allows excellent control during operation
- * Replaceable bushing ensures longer service life of the tool
- * Simple, reliable coil spring retainer
- * 2 types of bushing available (round or hex) this model is hex

Fully supported by Air & Allied Sales technical assistance and spare parts from stock!
