NORGREN 1/2" FRL KIT - Manual Drain

Product Code: B73FRL12WB

NORGREN 1/2" FRL KIT - Manual Drain

Norgren 1/2" BSP Professional Metal Bowl Filter, Pressure Regulator, Lubricator (FRL) Assembly complete with MANUAL DRAIN, pressure gauge and quick fit wall mounting bracket.

This is a top line product as it comes with metal bowl assemblies on both the Filter/Regulator and Oil Fog Mist (lubricator) unit, making them far more durable than polymer bowls that have a tendency to crack.

Unit has a flow rate of 80cfm (FR unit flows 106 cfm however the Lubricator flows 80 cfm making the complete unit flow 80 cfm).

You can fill the lubricator assembly from an easily accessible fill port in the top, and unlike other units you do not have to depressurise the line to do so, saving you time and making it easier and safer to keep the oiler topped up!

We offer these industrial units at very competitive prices making it easier for you to ensure you get the right pressure and clean, lubricated air to your tools!

Other options such as automatic drain, safety lock-outs, higher flow units, etc are available contact us for assistance.
