CAPIT PROFESSIONAL HELMET DRYER

Brand: Capit **Product Code: CHD070**

CAPIT PROFESSIONAL HELMET DRYER

Capit Professional Helmet Dryer, Black Colour - 230V with Australian & New Zealand Power Plug.

This item has been designed to truely and effectively solve one of the most annoying problems for anyone wearing a helmet: A DRY HELMET!

When you are focused on driving anything with a helmet on, you sweat, no matter what the ambient temperature is.

It so happens that during a cold season, and even worse when the heat is particularly warm and muggy, the helmet sweat doesn't dry out, thus creating problems of bad comfort, fogging of the visor or worse, sweat drops into the eyes.

The unit has a selectable switch on the back to choose between hot and cold air, and neatly fits into our GDS Walling system Helmet Boxes to allow easy placement and removal of your helmet from our Walling systems.
With the function "hot air" (however you can select also "cold air" function) the Helmet Dryer is able to dry the inside of the helmet in a few minutes.

This model is for 240V Australian and New Zealand region however it is also available in 110V and various power plugs for different regions, just ask us!
