NOMINAL PERFORMANCE DETAILS
WITH STANDARD DISPENSING KIT.

MOBI PUMP KIT

Mobi Pump Kit, powered by compressed air, has been designed to dispense liquids from 200 and 60 litre drums.

It creates a small differential between the drum and atmosphere. Mobi Pump is fast, efficient and a safe way to dispense liquids, with full control of the liquid flow from the dispensing nozzle.

It will empty a 200 litre drum of water in approximately 5 minutes!

Mobi pump has no moving parts and does not come into contact with the liquid being dispensed, providing long life, low maintenance and safe operation with flammable liquids and most chemicals.

Specifications

- Standard Accessories
- 1 x Mobi Pump, Compressed air on/off valve, 1 x Telescopic drum spear, 2 metres of 25mm Antistatic hose with Camlock connection, 1 x Dispensing nozzle.
