

Pre-filter, Med Grade Hepa & 6kg ActCarbon

Brand: **Inova**

Product Code: **E20/DE20FILTERBUNDLE**

Pre-filter, Med Grade Hepa & 6kg ActCarbon

A complete filter set for your E20 or DE20 system including a pre-filter, H13 HEPA filter and 6kg activated carbon filter.

Save \$50 compared to buying all 3 filters separately.

Technostat® high-efficiency Pre-filter.

The electrostatically charged first-stage pre-filter is designed to remove ambient fine dust particles and up to 99% of bacteria & viruses from the air.

The Technostat® pre-filter in InovaAir purifiers also extends the life of the main HEPA filter up to 5 years.*

Filter Life

Up to 6 months of continuous use*

H13 Medical-grade HEPA Filter

The HEPA filter removes viruses, bacteria, mould spores, allergens, pollen and dust mites before passing the air on to the third-stage filter. The E20/DE20/V20/DV20 HEPA filter has a 6.4m² surface area and is certified to filter to 99.95% @ 0.3 microns - tested down to 0.003 microns at 100% efficiency*.

Filter Life

3 - 5 years of continuous use*

E20/DE20 6kg Activated Carbon Filter

A 6kg activated carbon final stage filter, manufactured with a heavy-duty steel casing and airtight seals.

Designed to remove chemical pollutants, volatile organic compounds (VOC?s), smoke, road pollution and odours.

Filter Life

Up to 1 - 3 years of continuous use*

* Filter life will vary depending on dust & chemical concentrations present. As operating conditions vary based on levels of dust, chemicals & odours present, and system proximity to major pollution sources. InovaAir does not warranty consumable filter life.
