3/16" HYDROPNEUMATIC RIVETER

Brand: Gatx

Product Code: GP-0810S

3/16" HYDROPNEUMATIC RIVETER

3/16" Hydropneumatic riveter. This product is a proven performer for many years. It will easily pull a 3/16" stainless steel rivet and the trigger mechanism is a favourite with many of our heavy users.

The inlet swivels in a 360 degree rotation and the grip is comfortable. On the back of the main cylinder body there is a hanger to allow you to use it with a suspension system, making the tool almost weightless. This feature is also perfect for production lines where the tool can be suspended out of the main work area.

You also get a basic mandrel catcher which can be fixed to the back of the tool - eliminating spent rivet mandrels from falling on your work space or floor.

Included with the tool is a set of popular sized nozzles, spanner and nozzle changing tool.

Capacity Specifications:

* Stainless Steel Rivets: Ø 3.2 mm (1/8"), 4.0 mm (5/32"), 4.8 mm (3/16")

* Aluminium & Steel Rivets: Ø 4.8 mm (3/16")
