

1/4" HYDROPNEUMATIC RIVETER

Brand: **Gatx**

Product Code: **GP-0815**

1/4" HYDROPNEUMATIC RIVETER

1/4" Hydropneumatic riveter. This product is a proven performer for many years and is used in the truck body industry with great success. It is comfortable and easy to use and the components are made from premium materials to provide better durability when compared to inferior copies of this tool.

On the back of the body there is a hanger point to allow you to use it with a suspension system, making the tool almost weightless. This feature is also perfect for production lines where the tool can be suspended out of the main work area.

You also get a basic mandrel catcher which can be fixed to the back of the tool - eliminating spent rivet mandrels from falling on your work space or floor. Included with the tool is a set of popular sized nozzles, spanner and nozzle changing tool.

Capacity Specifications:

* Stainless Steel Rivets: Ø 4.0 mm (5/32"), 4.8 mm (3/16"), 6.3 mm (1/4"), 7.0 mm (9/32")
