AIR LANCE "Easy Push" STUBBY LOCK LL-12

Brand: **Krontec**

Product Code: **LL-03 K-AV-BVL**

AIR LANCE "Easy Push" STUBBY LOCK LL-12

NEW BALL VALVE LOCK, SHORT "Stubby" VERSION of the LL-03 Lance complete with Positive Lock Ball Valve FITTED with Krontec. PLUG (LL-12) fitting to allow connection of another lance (spike) to the end.

This was created out of requests by our customers who required a short lance to be able to disconnect the Air or Nitrogen supply line, keep the short lance connected, and then be able to slowly and safely lower the vehicle, and you wanted an easier to operate lever on the ball valve, with a safety lock feature. Again we have listened and delivered a premium product to do exactly what you need!

This Lance does not have the "car valve nipple" on the inlet like the LL_03K-AV, instead it has the Japan style plug so you can attach it directly to your race coupler on the end of the hoses we assemble, giving you greater flexibility!

This along with this lance the LL-03 "Standard" Lance is by far the most practical and durable air lance "Wand" for motorsport. Made in Germany to strict quality standards our range of lances are standard on all Porsche Carrera Cup cars, along with many other products we distribute, including air jacks, car valves and quick connect steering couplers etc...

This lance fits the LL-12 and LL-13 nipples, plus the LL-16 and LL-16PLUS car valves.

We are sure our competitive prices will ensure you get the best products at the best prices.
