Krontec High Performance Porsche AirJack

Brand: **Krontec**

Product Code: **LL-22-PP**

Krontec High Performance Porsche AirJack

Krontec High Performance Air Jack as used in Porsche Carrera Cup cars with special bottom collar (68mm diameter to fit the retainer sleeve) to fit Porsche rear air jacks.

It is always best to check the jacks in your vehicle and double check with us to ensure you get what you need right out of the box! This jack does not have a quick exhaust valve fitted.

We are here to help.

This jack also replaces the older "Krontec" version jacks used in the rear of Porsche prior to 2009. If your current rear jacks have laser etched on the side LL-22-P or LL-22-P-C then this is your current replacement jacks for them. If you have a different number on the side, please contact us and we will help you to get the right replacement jack.

As with all of the Krontec products we supply, this jack is fully supported by us.
