2.5M HIGH PRES SAFETY GAS TRAN HOSE ASSY

Product Code: PPSDIN300200025T50K

2.5M HIGH PRES SAFETY GAS TRAN HOSE ASSY

This 2.5 metre long high pressure safety transfer whip hose is complete with a 200/300 Bar Din fitting at one end to fit pressure cylinder/accumulator tank and at the other end a Spigot to fit Nitrogen bottle.

This is used to fill/re-charge a smaller "pit" bottle from a larger Nitrogen bottle with ease and most importantly safely. Simply fit the hose to the smaller "pit" bottle and then to the larger fill bottle open the valves on both bottles and re-charge. When the fill/re-charge is complete, close the valves and "bleed" the air in the line using the fitted block easily and safely.

This hose assembly is made from only the highest quality components, including safety hose, premium fittings and a bleed block. Different length hoses can be made to your specific requirements, contact us if you would like a different length.
