4.8mm PNEUMATIC RIVETER

Product Code: **RAC83/95**

4.8mm PNEUMATIC RIVETER

This is an Industrial, pneumatic (air) ONLY operated tool, which provides less maintenance as it does not require hydraulic (oil) fluid to assist in pulling of the rivet. This tool is a solid performer and is competitively priced.

The tool has a hanger point to allow it to be used with tool suspension systems and is fitted with an exhaust silencer, which greatly reduces operational sound levels. It also features a lightweight, comfortable and well balanced body shape to enhance operator comfort.

Capacity of this tool is from 2.4mm to 4.8mm (Aluminium).
