RET-RING 3/4"DR (1-7/16"ID)

Product Code: **RR10032CG**

RET-RING 3/4"DR (1-7/16"ID)

3/4" DR X 1-7/16" (36.51mm) ID socket retaining ring with Crush Gauge provides a safe and secure way to retain sockets to your tool, it will tell you when to replace worn sockets!

This part number is suited to 3/4" drive tools and has a 36.51mm (1-7/16") inside diameter to fit the socket groove.

This product is invaluable from an operational point, and most importantly a safety point. This product is far safer than the original way sockets are "retained" on the tool. The old way was via a metal pin and o ring, which can have a tendency to cause operator injury when the o ring loses it's tensile strength and can permit the metal pin to come out under rotational force. This can then be a dangerous safety hazard - this polyurethane product eliminates this danger.

Many sizes available for a multitude of applications.
