# RET-RING 3/4"DR (2-1/8"ID) <br> Product Code: RR18715CG 

## RET-RING 3/4"DR (2-1/8"ID)

3/4" DR X 2-1/8" ( 53.97 mm ) ID socket retaining ring with Crush Gauge provides a safe and secure way to retain sockets to your tool, it will tell you when to replace worn sockets!

## Specifications

Drive

Inside Diameter (id)
3/4"
$53.97 \mathrm{~mm}(2-1 / 8 ")$

This part number is suited to $3 / 4$ " drive tools and has a $53.97 \mathrm{~mm}(2-1 / 8$ " $)$ inside diameter to fit the socket groove.

This product is invaluable from an operational point, and most importantly a safety point. This product is far safer than the original way sockets are "retained" on the tool. The old way was via a metal pin and o ring, which can have a tendency to cause operator injury when the o ring loses it's tensile strength and can permit the metal pin to come out under rotational force. This can then be a dangerous safety hazard - this polyurethane product eliminates this danger.

Many sizes available for a multitude of applications.
