

INDUSTRIAL SAND RAMMER / TAMPER

Brand: **Toku**

Product Code: **TB0G**

INDUSTRIAL SAND RAMMER / TAMPER

This is a quality Japanese manufactured product, made to last! Our sand rammers/tampers are ideal for compacting backfill for trenches and soil around foundations and other structures.

This is the smallest/most compact model in the range along with the TB00G. We find these particularly suited to use in foundries where they are used for compacting small to medium sized moulds, plus other applications.

The tool comes with a 2-1/8" (53.5mm) rubber foot/butt as standard, and features a powerful compacting ability in a small portable tool. We have a full range of sand rammers/tampers for varied applications, including foundry works for mould processing etc, please visit the section on our online catalogue for your product selection.

We offer full technical and spare parts support ensure your investment in our imported products is a wise decision.
