

INDUSTRIAL SAND RAMMER / TAMPER

Brand: **Toku**

Product Code: **TB1N**

INDUSTRIAL SAND RAMMER / TAMPER

This is a quality Japanese manufactured product, made to last! Our sand rammers/tampers are ideal for compacting backfill for trenches and soil around foundations and other structures.

This model is particularly suited to foundries for medium to large moulds where a compact tool is required. The tool comes with a 2-1/2" (65.5mm) rubber foot/butt as standard, and features a very powerful compacting ability in a small portable tool. It has a more compact body n extended handle to allow the user to reach deep inside certain applications. You also have an option to purchase a steel foot/butt if your application requires it (see associated products).

We have a full range of sand rammers/tampers for varied applications, including foundry works for mould processing etc, please visit the section on our online catalogue for your product selection.

We offer full technical and spare parts support ensure your investment in our imported products is a wise decision.
