

INDUSTRIAL H/DUTY STRAIGHT NEEDLE SCALER

Brand: **Toku**

Product Code: **TN300H**

INDUSTRIAL H/DUTY STRAIGHT NEEDLE SCALER

Industrial Heavy Duty Straight Needle Scaler - Made in Japan. This product was conceived from requests by our mining and construction customers who required a straight needle scaler with good power, durability and reliability, that was also easy to handle and has 19 needles in a set.

The TN300H is perfect for hard to reach applications because the solid and comfortable rear handle arrangement makes it easy to "get into" those tight spaces, whilst still being able to apply good pressure to the scaling surface without compromising operator comfort.

Applications include shipyards, heavy fabrication, conveyor and bulldozer track maintenance - anywhere you need to remove hard scale or even dirt or debris from those hard annoying places.

This is a unique tool and we are sure it will satisfy your most demanding requirements.
