

1/2" IN-LINE FILTER/LUBRICATOR

Product Code: **TX-OLF**

1/2" IN-LINE FILTER/LUBRICATOR

1/2" Heavy Duty Inline Filter/Lubricator - Made in the USA. This product has an adjustable oil feed regulator inside, and comes with sight glass so you can easily see if the oil needs to be topped up.

This product is recommended for use with any construction tool, or air tool that is used on a site where a fixed lubrication and filtration system is not available. It features a sintered brass filter that can easily be removed and cleaned for fast and easy maintenance. The filter serves to remove any larger pieces of contaminants (not water) before they pass to the tool. It is this filtering that can reduce unwanted maintenance costs and gives the tool the best opportunity to perform how it is intended.

The use of this product is intended to enhance tool performance and durability.
