

IMMERSION VIBRATOR - 35MM

Product Code: **VL35**

IMMERSION VIBRATOR - 35MM

35mm Industrial Immersion Vibrator is made in Australia and is designed for use in concrete construction to provide improved concrete consolidation. This model is complete with a 2m lead hose, serviceable air strainer and a claw coupler (Type A) with safety clip.

By vibrating fresh concrete it becomes more liquid thus filling any air pockets. With these vibrators you will achieve superior concrete integrity with greater strength and less chance of cracking or crumbling.

This product is manufactured to work, every day, day after day. Constructed from high quality hardened ground steel, they are engineered to withstand the harshest treatments. All models in this series are easy to maintain and are backed by our comprehensive after sales service and support.
